DIRECTOR,
DOP

Our establishment was launched with a very talented, open-minded director Andrey Kovalev, he is the ideological inspirer and creator of the company.

Since 2009 Andrey has been involved in photo and video production. During that time, he has gained experience as a universal clip-

maker, performing the work of a director, DP, gaffer, editor and colorist and that allows to qualitatively track each stage of video production and not miss even the smallest detail.

PRE-PRODUCTION

Full preparation cycle: from idea and synopsis to creation of exclusive locations. We will create a script, conduct a casting of models, take over the work with documents. You will have a complete picture of the project, before the shoot begins.

PRODUCTION

We will link all locations, transportation timings, outlays between the takes and provide everything on time to save the client's time and budget. The selection of high-quality equipment, suitable for the tasks of the project, is our responsibility - we will record the sound, set up the light, turn on the camera - ACTION!

POST-PRODUCTION

Editing, color correction, mastering and sound design are what we do in the post-production stage, as well as the visual effects of any complexity. Our producers study the material in detail in order to convey the desired message to the viewer, correct composition and competent advertising integration.
